

Supervisor assessment of Master's Thesis

Student: Kulich Martin, Ing.

Title: Dynamic Template Adjustment in Continuous Keystroke Dynamics (id 17918)

Supervisor: Drahanský Martin, doc. Ing., Dipl.-Ing., Ph.D., UITŠ FIT VUT

1. Assignment comments

The assessment complexity is average. The project is connected to the research activity realized at the Gjovik University College. All the points from assessment were fulfilled.

2. Literature usage

All literature sources have been found by the student. He was active and just consulted some relevant publications.

3. Assignment activity, consultation, communication

There were not many consultations during the realization time. The amount of consultations increased before the submission time. However the student was active. He was prepared for each consultation and came on time.

4. Assignment finalisation

This MSc. project was realized for a longer period and was finished in an adequate time before the final submission. However the submitted text of the project was not deeply discussed.

5. Publications, awards

No publication activity and awards are known for me.

6. Total assessment

good (C)

On the base of the above stated points there could be written that the overall activity of the student was approx. average, i.e. **C** (good).

In Brno 4. June 2015
