

OPPONENT'S REPORT OF DIPLOMA THESIS

Author diploma's thesis: Bc. Pavel Subally

Opponent diploma's thesis: Ing. Lukáš Žižka

Opponent's report was prepared for master's project „UNIVERSITY LIBRARY“, which was designed by Bc. Pavel Subally in the school year 2015/2016. Project of the master's thesis solves processing project documentation for a new university library.

I have observed the following mistakes:

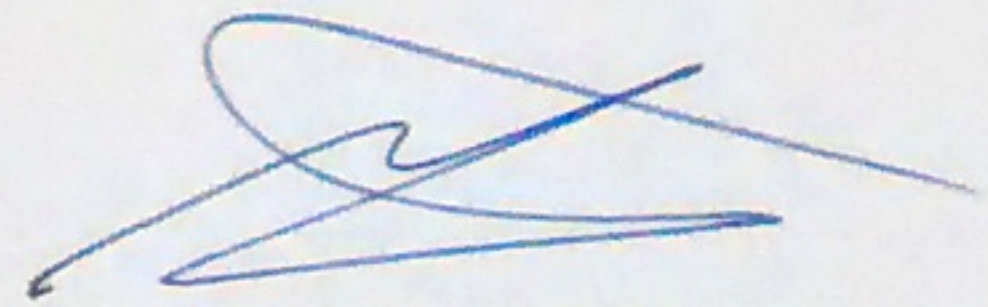

- Project documentation isn't drawn according to ČSN 01 34 20.
- Details of structures not marked in the drawings and are not detailed enough. It would be preferable to choose a different more troubled position next time.
- The PD are not complied with requirements for hygiene facilities of the buildings.
- In the drawing of roof there are 4 roof drains marked, whereas in the plan of 3OF only 2 stacks are drawn, moreover at other locations than in drawing of the roof.
- The height dimensions in the drawing of slab between 2OF and 3OF does not correspond to the height concept of building.

Opponent's questions:

- How will the substructure of the object be conducted?
- Why are the foundation pads made of plain concrete?
- How is the object barrier?

Classification level ECTS: *E/3*
