

The architectural drawing shows a detailed floor plan of a building. It features several large rectangular rooms, some of which are labeled with their dimensions (e.g., 8000x7000, 6000x4000). There are also smaller rooms and corridors throughout the layout. Stairs are indicated by sets of parallel lines and arrows. The plan includes numerous dimension lines with numerical values indicating room sizes, wall thicknesses, and other spatial measurements. A north arrow is positioned in the lower right corner of the drawing.
