

Supervisor assessment of Master's Thesis

Student: Ostroukh Anna, Ing.

Title: Trajectory Data Preprocessing Framework for Discovering Semantic Locations (id 19631)

Supervisor: Ismael Mazen, Ing., MSc, UIFS FIT VUT

1. Assignment comments

The student covered all the requirements, and I am satisfied her work and the results.

2. Literature usage

The student used the references in a good way; the importance, novelty and the number of literature are quite good.

3. Assignment activity, consultation, communication

The student was self-motivated creative and active, she fulfilled attending all the meetings, and covered all the notices and requirements.

4. Assignment finalisation

The student discussed with me in all the important points related to her thesis. The work was finished in the time without any delay.

5. Publications, awards

Student did not published

6. Total assessment

very good (B)

The student's work is sufficient and professional and the implementation was designed professionally.

From my point of view, since academic writing was interesting, I would recommend the student to continue her research as a PhD student.

My exact evaluation is 89

In Brno 8. June 2018
